TABLE OF CONTENTS ALARM HANDLING

TABLE OF CONTENTS ALARM HANDLING

PANEL TYPES MANUAL

TABLE OF CONTENTS ALARM HANDLING

TABLE OF CONTENTS ALARM HANDLING

2GIG:

ARM (Stay Mode): *Use Stay Mode to arm the system when anyone will be staying home. Stay Mode normally has an Entry Delay so someone with a User Code can re-enter without causing an alarm.*

1. Close all protected perimeter doors and windows before arming.
2. Verify that the button on the Control Panel is lit green indicating that the system is ready to arm. The SECURITY button and ARM button on the display will also be green when all sensors are closed.
3. From the Security Screen, or the Menu Screen, press ARM

ARM (Away Mode): *Arming to Away Mode Use the Away Mode to arm the system when everyone will be leaving the home. The Away Mode normally has an Entry Delay so someone with a User Code can re-enter without causing an alarm. Interior and perimeter sensors are armed in the Away Mode.*

1. Close all sensor-protected doors and windows before arming
2. Verify that the HOME button on the Control Panel is lit green, indicating that the system is ready to arm. The SECURITY button and ARM button on the display will also be green when all sensors are closed.
3. From the Security Screen, or the Menu Screen, press ARM.

DISARM:
1. From the Home Screen, press the SECURITY button.
2. From the Security Screen or the Menu Screen, press DISARM.
3. Enter Valid User Code to disarm
-If you press the wrong key hit the CLEAR button

Alerts/Alarms/Resetting:

1. The alarm memory will automatically clear the next time the system is armed.
2. You can also check the **CLEAR ALARM HISTORY** button and press OK to manually clear the alarm memory (24-hour fire and CO sensors that are still violated will remain in alarm memory).

SILENCING/RESETTING ALARM:
Silence the fire alarm sounder by entering the user code
Review the alarm memory to determine which sensors caused the alarm. If the alarm restarts, there may still be smoke in the detector's sensor.
Enter the user code again to stop the alarm, then fan the detector for 30 seconds to clear the detector's sensor chamber, then check the **CLEAR ALARM HISTORY** button on the alarm memory screen, Press OK. Enter user code
(Fire & CO sensors that are still violated cannot be cleared from alarm history until the device returns to normal operation. Carefully inspect the premises for danger if fire or CO sensors remain in alarm.)

Force Bypassing Sensors: *If any sensors are open when the ARM button is pressed, the Control Panel will display the bypass sensor screen. When the system is disarmed, the force bypassed sensors will be returned to normal.*
1. With one or more sensors open, press ARM from the Security or Menu Screen.
2. Press BYPASS ALL to force bypass the open sensors.
3. Enter a User Code *(unless "Quick Bypass" has been set by the installer)* **to** activate the bypass and continue to the Arming Screen.

Manual Bypassing Sensors: *In case one or more sensors need to be manually bypassed because of a trouble condition, or have their manual bypass removed, use the following steps:*

1. Press MENU, TOOLBOX, then BYPASSED SENSORS.
2. Enter a User Code.
3. Press the individual name of the sensor(s) to bypass or un-bypass the sensor(s). The bypass symbol will display for the manually bypassed sensors. Bypasses to all listed sensors can be removed by pressing UNBYPASS ALL.
4. Press OK.

To Setup Chime Mode On Sensors:

1. On the Menu Screen, press TOOLBOX
2. On the Toolbox Screen (1 of 3), press CHIME SETUP
3. Enter the Master User Code to setup the chimes for the sensors
4. The Chime Setup Screen will display each of the installed sensors that can chime, and the option currently set for the sensor. Press the sensor button to change the sensor's chime options.
5. There are six chime options for each sensor. Check the option that you want for the sensor, then press OK
6. Press BACK when finished

FIRE SYSTEM 2GIG PANEL:

Silencing Fire Alarm: *If the fire alarm is sounding due to a detector sensing burnt food or some other non-emergency condition*
Follow these steps to stop the alarm:

1. Silence the fire alarm sounder by entering your User Code.

2. Review the alarm memory to determine which sensor(s) caused the alarm.
3. If the alarm restarts, there may still be smoke in the detector's sensor. Enter your User Code again to stop the alarm. Fan the detector for 30 seconds to clear the detector's sensor chamber.
4. After the problem has been corrected, check the CLEAR ALARM HISTORY button on the Alarm Memory Screen and press OK. *(Fire & CO sensors that are still violated cannot be cleared from alarm history until the device returns to normal operation. Carefully inspect the premises for danger if fi re or CO sensors remain in alarm.)*
5. Enter the Master User Code (the factory setting is 1111).
6. The Users Screen displays three users at a time. Use the ↓ and ↑ arrows to scroll through the list.

CHIME MODE: *To setup the chime options individually for each sensor. Use the following steps:*

1. On the Home Screen, press SECURITY.
2. On the Security Screen, press MENU.
3. Note the two check boxes on the Menu Screen. The CHIME check box button turns the chimes on or off for all the system's sensors. The VOICE check box button turns the voice announcements for the system's messages on or off *(except alarm voice messages).*
4. On the Menu Screen, press TOOLBOX.
5. On the Toolbox Screen (1 of 3), press CHIME SETUP.
6. Enter the Master User Code to setup the chimes for the sensors.
7. The Chime Setup Screen will display each of the installed sensors that can chime, and the option currently set for the sensor. Press the sensor button to change the sensor's chime options.

8. There are six chime options for each sensor. Check the option that you want for the sensor, then press OK.

9. Press BACK when finished.

ADEMCO PANELS (Lynx, Lyric, and Vista panels):

Lynx Touch 5100, 5200, 5210, 7000 (This is a touch Screen Panel):

ARM (Stay Mode):

1. Press the icon that has the "house with a lock inside of it"
2. Then enter user code

ARM (Away Mode):

1. Press the icon that has the "house with lock and person running out of the house"
2. Then enter user code

DISARM:

1. Press the icon that has the "house with the lock showing it unlocked"
2. Then enter user code

CHIME:

Press the SETTINGS icon then CHIME icon. In this section we are able to have the customer turn on or off the chime.

Bypass:

1. Press on the "ZONES"
2. icon Click on the zone you would like to bypass and click on "BYPASS."

Add User:

• Press "TOOLS" + Enter master code
• Select "ADD NEW" then select "NAME" and hit clear. Type in the new user name for the code and hit DONE
• Select "USER CODE" then enter the 4-digit code
• Select DONE then SAVE

Change/Edit User:

• Press "TOOLS" + Enter master code
• Select "EDIT/DELETE" then select "NAME" and hit clear. Type in the new user name for the code and hit DONE
• Select "USER CODE" then enter the 4-digit code
• Select DONE then SAVE

Delete User:

• Press "TOOLS" + Enter master code
• Select "NAME" then press DELETE
• Select Done and then SAVE

Alerts/Alarms/Resetting:

1. Press on the "ZONES" icon
2. When in the zones list there will be a button on the bottom of the screen that shows "CLEAR ALL TROUBLES," please have the customer clear that out.

3. Once hitting the clear all troubles, they will need to put their user code into the panel. They may have to try and clear it two times.

Testing System:

1. Make sure system is disarmed and all sensors (windows & doors) are closed.
2. Select TOOLS > then enter 4-digit code
3. Select TEST icon
4. Then you can select: Walk Test, Dialer Test, Communication Test, or reboot icon
5. After testing the system will reboot itself

Lyric Controller

ARM (Stay Mode):

1. Press the icon showing a check mark with a house
2. Then enter user code

ARM (Away Mode):

1. Press the icon showing a check mark with a house with an arrow
2. Then enter user code

DISARM:

1. Press the icon showing a shield with a line through it
2. Then enter user code

CHIME:

1. Select the Settings icon, located on the home screen
2. Go to the menu that says "Chime volume *(count down beeps, other sounds)*
3. Select chime and use the slider.

Silencing Alarm/Resetting:

1. Repeat the disarm procedure to silence alarms.
2. To clear memory of an alarm on the screen press the HOME button beneath the screen
3. Re-enter the user code
4. Select zones on the security menu > then press CLEAR ALARMS
5. Enter 4-digit user code >then press HOME

ADDING USER/DELETEING USER:

Add User:

1. Press "TOOLS" + Enter master code
2. Select "ADD NEW" then select "NAME" and hit clear. Type in the new username for the code and hit DONE
3. Select "USER CODE" then enter the 4-digit code
4. Select DONE then SAVE

Delete User:

1. Press "TOOLS" + Enter master code
2. Select "NAME" then press DELETE
3. Select DONE and then SAVE

Change/Edit User:

1. Press "TOOLS" + Enter master code
2. Select "EDIT/DELETE" then select "NAME" and hit clear. Type in the new username for the code and hit DONE
3. Select "USER CODE" then enter the 4-digit code
4. Select DONE then SAVE

Bypass:

1. Before arming the system press ZONES on the menu
2. Use the up and down arrows to scroll through the listed zones. Then select the zone or zones to be bypassed.
3. Press the BYPASS at the bottom of the screen & enter code when keypad appears. *(you can also click on bypass all faulted, which selects all zones that have a fault or an issue)*
4. Then arm the system as usual.

Testing System:

1. Press TOOLS > then enter 4-digit Master Code > Press ADVANCED
2. Press Comm. Test *(This checks the system's cell & internet network connection)*
3. If the test is successful, the panel will display SERVICE OK or ACK RECEIVED
4. Finish by pressing the back arrow to run a different test or press the HOME > then enter the 4-digit Master Code if prompted too

Vista- 128 FBP & Vista- 250 FBP, Ademco 4110DL, Ademco 4110XM, Ademco 5140XM

Bypass:

1. Enter your security code and press the # 6 key.
2. Enter the zone number that needs to be bypassed. *(example: 002,003,013)*
a. ALL SINGLE DIGIT ZONES NEED TO HAVE A "00" before the number.
3. Press * and * again.
4. The display on the panel will show BYPASS along with the zone number.
5. Then arm the system as usual when the keypad displays "Ready".
Group Bypassing: Enter the security code + the # 6 then press the * *(asterisk)* then enter the group number *(Example: 1-15 or 3-6)*.

Arm (Stay mode):

1. Enter the security code and press # 3 key.
(This arms the perimeter and allows the customer to stay inside the house)

Arm (Away mode):

1. Enter the security code and press # 2 key.
(This arms everything) **NOTE:** *will say "YOU MAY EXIT NOW" when system is arming*

Disarm:

1. Enter the security code and press # 1 (off) key.
(The ready message will display if no alarms were occurred while system was armed.)

Chime mode:

1. To turn chime mode on: enter the security code and press # 9 key.

2. The chime mode on message will appear for about 2 seconds *(to display this message hold down the # 9 key for 5 seconds.)*

3. To turn chime mode off: enter the security code and press # 9 key.

4. The chime mode off message will appear for about 2 seconds then disappear.

Resetting/Clearing Alarm Panel:

1. Enter Security code and press the # 1 key.

2. Repeat this a second time enter security code and press the # 1 key *(sometimes might have to do it a 3rd time).*

Add User:

1. Enter master code + 8 key.

2. Enter user # (should be 3-digits ex: 003 or 012)

3. Enter the 4-digit user code

4. There will be prompt that will ask "Add New User" press 1 for yes or 0 for no.

(After entering yes there will be other prompts for them to follow on user level and area's they would like the user to have access too)

Edit/Change User:

1. Enter master code + 8 key followed by the user # that you would like to change.

2. Enter new code for the user.

3. The prompt will show "Add New User" Press 0 for no to change the existing user code.

Delete User:

1. Enter master code + 8 key followed by the user # that you would like to delete.

2. Then enter master code again

3. Prompt will show: "Ok to Delete?" Press 1 for yes or 0 for no

Testing System:

1. Enter the security code and press the # 5 key

2. The external sounder should sound for 3 seconds and then turn off *(If the sounder doesn't sound it may be due to a dialer issue)*

3. While testing the keypad will beep every 15 seconds as a reminder that it is in test mode

4. Open & close each protected door & window, then listen for 3 beeps *(each zone should show on the display)*

5. To turn test mode off enter the security code then # 1 key

Ademco Vista 128 FBPT & Vista 250

ARM (Stay):

1. Enter 4-digit code then press the # 3 key (Stay)

ARM (Away):

1. Enter 4-digit code then press the # 2 key (Away)

DISARM:

1. Enter the 4-digit code then press the # 1 key (Off)

CHIME:

1. Enter the 4-digit code then press the # 9 key to turn on or off chime mode

Testing System:

1. Enter the security code and press the # 5 key

2. The external sounder should sound for 3 seconds and then turn off *(If the sounder doesn't sound it may be due to a dialer issue)*

3. While testing the keypad will beep every 15 seconds as a reminder that it is in test mode

4. Open & close each protected door & window, then listen for 3 beeps *(each zone should show on the display)*

5. To turn test mode off enter the security code then # 1 key

Panic Key Functions for Testing:

Press # 1 key & * key

Press # 3 key & # key

Press * key & # key

Alerts/Alarms/Resetting:

1. Enter the 4-digit code & press the # 1 key (Off)

2. Repeat this 2 times if it does not silence the alarm or reset it

Fire Drill Test Mode:

1. Enter the 4-digit code & press # then 69

2. When done testing enter the 4-digit code then press # 1 key (off)

ADDING USER/CHANGING USER:

1. Enter the master code then press the # 8 key

2. Enter the users 3 digit # (example: 002-250)

3. Enter the 4-digit code for that user

4. Follow the prompts that appear for that specific user

DELETING USER:

1. Enter the master code then press the # 8 key

2. Enter the users 3 digit # (example: 002-250)

3. Enter master code again

4. Follow the prompts to delete the user

BYPASS:

1. Enter the 4-digit code then press the # 6 key (Bypass)

2. Enter the zone # to be bypassed (Ex: 003 or 012)

3. Press the * key then *key again

4. The keypad will display "Bypass" along with each bypassed zone

Quick Bypass: Enter the 4-digit code then press the # key

VISTA 10, VISTA 30 +, 4111XM, VISTA100, VISTA128B, VISTA128 BPT, VISTA250BPT, VISTA128BPTSIA

Bypass:

1. Enter your security code and press the # 6 key.

2. Enter the zone number that needs to be bypassed. *(example: 02,03,13)*

(ALL SINGLE DIGIT ZONES NEED TO HAVE A "0" before the number)

3. Press * and * again.

4. The display on the panel will show BYPASS along with the zone number.

5. Then arm the system as usual when the keypad displays "Ready".

Arm (Stay mode): Enter the security code and press # 3 key.

(This arms the perimeter and allows the customer to stay inside the house)

Arm (Away mode): Enter the security code and press # 2 key.

(This arms everything) **NOTE:** *will say "YOU MAY EXIT NOW" when system is arming*

Disarm: Enter the security code and press # 1 (off) key.

(The ready message will display if no alarms were occurred while system was armed.)

Chime mode:

1. To turn chime mode on: enter the security code and press # 9 key.

2. The chime mode on message will appear for about 2 seconds (to display this message hold down the # 9 key for 5 seconds.

3. To turn chime mode off: enter the security code and press # 9 key.

4. The chime mode off message will appear for about 2 seconds then disappear.

Resetting/Clearing Alarm Panel:

1. Enter Security code and press the # 1 key.

2. Repeat this a second time enter security code and press the # 1 key *(sometimes might have to do it a 3rd time)*.

Add/Change User:

1. Enter master code + 8 key

2. Enter the single digit user # you would like to use or change

3. Enter 4-digit user code, the console will beep once indicating this has been done correctly.

Delete User:

1. Enter the master code + 8 key.

2. Enter the single digit user # you would like to remove.

3. The console will beep once indicating it has been deleted.

Testing System:

1. Enter the security code and press the # 5 key

2. The external sounder should sound for 3 seconds and then turn off *(If the sounder doesn't sound it may be due to a dialer issue)*

3. While testing the keypad will beep every 15 seconds as a reminder that it is in test mode

4. Open & close each protected door & window, then listen for 3 beeps *(each zone should show on the display)*

5. To turn test mode off enter the security code then # 1 key

VISTA 10P, VISTA10SE, VISTA 15, VISTA 20, VISTA 20P, VISTA20SE, VISTA32FB, VISTA40, VISTA50, VISTA50P

Bypass:

1. Enter your security code and press the # 6 key.

2. Enter the zone number that needs to be bypassed. *(example: 02,03,13)*

(ALL SINGLE DIGIT ZONES NEED TO HAVE A "0" before the number)

3. Press * and * again.

4. The display on the panel will show BYPASS along with the zone number.

5. Then arm the system as usual when the keypad displays "Ready".

Arm (Stay mode): Enter the security code and press # 3 key.

(This arms the perimeter and allows the customer to stay inside the house)

Arm (Away mode): Enter the security code and press # 2 key.

(This arm everything) **NOTE:** *will say "YOU MAY EXIT NOW" when system is arming*

Disarm: Enter the security code and press # 1 (off) key.

(The ready message will display if no alarms were occurred while system was armed)

Chime mode:

1. To turn chime mode on: enter the security code and press # 9 key.

2. The chime mode on message will appear for about 2 seconds *(to display this message hold down the # 9 key for 5 seconds)*

3. To turn chime mode off: enter the security code and press # 9 key.

4. The chime mode off message will appear for about 2 seconds then disappear.

Resetting/Clearing Alarm Panel:

1. Enter Security code and press the # 1 key.

2. Repeat this a second time enter security code and press the # 1 key

(sometimes might have to do it a 3rd time).

Change User:

1.Enter master code + 8 key

2.Enter the 2-digit user # (for example: 02-12)

3.Enter new code

4.Enter new code again

Add User:

1. Enter master code + 8 key

2. Enter the 2 digit user # you would like to add

3. **Enter the user code** *(keypad will beep once when the user code is successfully added)*

Delete User:

1. Enter master code + 8 key

2. Enter user # you wish to remove + # key + 0

Testing System:

1. Enter the security code and press the # 5 key

2. The external sounder should sound for 3 seconds and then turn off *(If the sounder doesn't sound it may be due to a dialer issue)*

3. While testing the keypad will beep every 15 seconds as a reminder that it is in test mode

4. Open & close each protected door & window, then listen for 3 beeps *(each zone should show on the display)*

5. To turn test mode off enter the security code then # 1 key

APEX Destiny 6100

ARM (STAY):

1. Press the # or H key (Home key).
2. If no zones are open, the red HOME LED will light, and you will hear the system say ARMED TO HOME over the phone or through the speaker.

ARM (AWAY):

1. Press the # or A key (Away key)
2. If no zones are open, the green AWAY LED will light, and the system will say ARMED TO AWAY over the phone or through the speaker

DISARM: Enter code and then you will here "control is disarmed"

CHIME:

1. Access Sound Settings from the home screen
2. Press the small grey bar at the top
3. Check system volume, Press volume option
4. Check individual chime, each sensor can have its own chime setting

Alerts/Alarms/Resetting: Enter the security code then press the # 6 key

ADDING USER/DELETEING USER:

1. Enter master code then press # 7 key (system will say enter user #)
2. Enter the 2-digit user number (system will say enter user code)
3. Enter the 4-digit code

(If it's a new code the system will say "Exit")

DELETEING USER:

1. Enter master code then press # 7 key (system will say enter user #)
2. Enter the 2-digit user number *(system will say enter user code)*
3. Enter the 4-digit code or hit A key to delete the code

(If the code is deleted the system will say "code out")

BYPASS

1. Enter security code and press the # 9 key. *(You will hear BYPASSED MODE ENTER ZONE NUMBER)*
2. Enter the 2-digit zone number of the zone. *(You will hear BYPASSED ON or OFF).*
3. Press the * or the A. the yellow status led will light to indicate the zone is bypassed.
4. Press the * or H key to exit "bypass mode"

Clearing a Bypass: Press 00 when in bypass mode.

Testing System:

1. Press the 6 key and Monitor key to send an emergency alarm *(if this doesn't work)*
2. Or press the 9 key and F1 key to send a panic alarm to send a signal through

ARROWHEAD EKP1, ARROWHEAD KP600FL, ARROWHEAD SK1L

ARM: Enter user code, then press # key

DISARM: Enter user code, then press # key

CHIME:

1. Enter code, then press * key, then # 6 key then * key again

2. This is used to turn on or off chime mode

Alerts/Alarms/Resetting: Enter the security code then press the # 6 key

BYPASS: Enter code, then the 2-digit zone # and then # key

ADDING USER/DELETEING USER:

1. Enter master code, then press the * key

2. Press the 7 key then press the * key again

3. Enter the 2-digit user # then press * key

4. Enter the 4-digit code then press # key to exit when done

DELETEING USER:

1. Enter the master code, then press the * key

2. Press the 7 key then press the * key again

3. Enter the 2-digits user # then press the # key to delete the code

ALERTS/ALARMS/RESETTING: Press the 1 key & 3 key at the same time to reset the panel and clear any alarms

TESTING COMMUNICATION:

1. Start Test Mode: Enter user code then press # 4 key & press the # key

2. End Test Mode: Enter user code then press # key

(During test mode, the customer can test every door, window and motion detector)

CADDX NX 6 (GE-NX 6)

ARM (Stay): Enter 4-digit code or 6- digit code, then press stay key *(the stay light will light up)*

ARM (Away): *(Close all protected doors & windows)*

Enter 4-digit code or 6-digit code *(the arm & exit lights will light up)*

DISARM:

1. Enter the 4-digit code or 6-digit code

2. The red armed light will turn off

CHIME: Press the chime key to turn on or off the mode

(If chime is on the chime light would be light up)

BYPASS:

1. Press the Bypass key

2. If required enter the 4- 6-digit code

3. Bypass light will flash, then enter the 1- or 2-digit zone # you wish to bypass

4. Press the bypass key again

5. Press # key to exit bypass mode

EMERGENCY KEYS:

Police, Fire Medical Symbols on the keypad

ADDING USER/DELETEING USER:

The system must be disarmed to do user code changes/deletions

ADDING/CHANGING USERS:

1. Press the * key

2. Press the 5 key

3. Enter the master code *(the ready light will flash)*

4. Enter the 2- digit user #

5. Enter the 4 digit or 6-digit code

6. The ready light will flash indicating you are back to step 3. *(if the code is rejected this will do a beep 3 times)*

7. Press the # key when the ready light is flashing to exit the user code programming mode

DELETING USERS:

1. Press the * key

2. Press the 5 key

3. Enter the master code (the ready light will flash)

4. Enter the 2- digit user #

5. Then enter * * * * or * * * * * * (* key 4- 6 times) to delete the user code

Alerts/Alarms/Resetting: Press the * key and then the 7 key to reset

Testing System: (How to Access System Testing)

If programmed this function will perform a battery test, communicator test, or siren test

1. Press the * key

2. Press the 4 key

3. If the siren test is performed, enter the user code to silence the siren

(No alarms will be sent & no reports will be sent unless a communicator test is performed, at which time a test signal will be sent)

CADDX NX 8 (GE-NX 8)

ARM (Stay): Enter 4-digit code or 6- digit code, then press stay key *(The stay light will light up)*

ARM (Away): Enter 4-digit code or 6-digit code *(the arm & exit lights will light up)*

DISARM:

1. Enter the 4-digit code or 6-digit code

2. The red armed light will turn off

CHIME: Press the chime key to turn on or off the mode *(If chime is on the chime light would be light up)*

BYPASS:

1. Press the Bypass key

2. If required enter the 4- 6-digit code

3. Bypass light will flash, then enter the 1- or 2-digit zone # you wish to bypass

4. Press the bypass key again

5. Press # key to exit bypass mode

ADDING USER/DELETEING USER:

The system must be disarmed to do user code changes/deletions

ADDING/CHANGING USERS:

1. Press the * key

2. Press the 5 key

3. Enter the master code (the ready light will flash)

4. Enter the 2- digit user #

5. Enter the 4 digit or 6-digit code

6. The ready light will flash indicating you are back to step 3. *(if the code is rejected this will do a beep 3 times)*

7. Press the # key when the ready light is flashing to exit the user code programming mode

DELETING USERS:

1. Press the * key

2. Press the 5 key

3. Enter the master code *(the ready light will flash)*

4. Enter the 2- digit user #

5. Then enter * * * * or * * * * * * (* key 4- 6 times) to delete the user code

Alerts/Alarms/Resetting: Press the * key and then the 7 key to reset

Testing System: (How to Access System Testing)

If programmed this function will perform a battery test, communicator test, or siren test

1. Press the * key

2. Press the 4 key

3. If the siren test is performed, enter the user code to silence the siren

(No alarms will be sent & no reports will be sent unless a communicator test is performed, at which time a test signal will be sent)

EMERGENCY KEYS:

Police, Fire Medical Symbols on the keypad

Concord 4 (Interlogix)

ARM (Away): Press the 3 key, then enter the user code

ARM (Stay): Press the 2 key, then enter the user code

DISARM: Press the 1 key, then enter the user code

CHIME: Press the 7 key, then press the 1 key to toggle between chime being on or off

Alerts/Alarms/Resetting: Press the 1 key, then enter the user code twice. OR press the reset button

ADDING USER/DELETEING USER: *(Can add up to 242 users)*

1. Swipe Down the grey bar at the top to access settings

2. Click on "Settings"

3. Click on "Advanced Settings"

4. Enter 4-digit code

5. Click on "User Management"

6. Click on "Add User"

Once on "Add User" screen you can create a custom name & user code. You must indicate if you want the code to be a "Master, User or Guest Code"

7. To remove a user, you follow the above steps and click on the user you would like to remove.

MASTER CODE: Access to panel functions, camera & system settings

USER CODE: Access to panel functions & camera

GUEST CODE: This is used to give to users who will only Arm & Disarm the panel on a temporary bases

EXPIRATION DATE: This can be used to choose a specific date that the user code will be disabled "Automatically" on that date.

Bypass:

1. When arming the system, you can view "Additional Options" by clicking on the double arrow ">>" icon on the right side

2. Select Bypass option

3. Touch the circle next to a sensor to bypass it during the arming sequence

Testing System: (How to Access System Testing)

1. Swipe down to Access "Settings," Click on "Settings, then on "Advanced Settings"

2. Enter 4-digit code > then click on "System Test" *(A list of tests will come up to choose from)*

C&K 236, 236I

Arm (Stay Mode):

1. Make sure the green ready light is on.

2. Enter your pin then press the * key then (7) then (4) keys and # key.

Arm (Away Mode):

1. Make sure the green ready light is on.

2. Enter your 4-digit security code then press # key. (if you do not exit

before the exit delay time expires it will automatically

3. If the code is entered in wrong the keypad will beep 5 times. After the 5th time you can re-enter the security code again.

4. If you exit through the exit delay door the system will automatically arm EVERYTHING.

Disarm: Enter the 4-digit security code then press the # key.

Bypass:

1. Enter your security code #

2. Push the * key and enter the 2 key followed by the 2-digit zone #, then press # key again.

3. Disarming the alarm REMOVES ALL BYPASSES.

Resetting/Clear Alarm Panel: press the * key then the 1 and then the # key.

Fire Reset Press the * key, then enter the 6 key and the 2-key followed by the # key. This should reset alarms.

Burg Reset press the * key, then enter 1 key followed by the # key.

Chime Mode: press the * key enter the 5 key, followed by the # key. Do this to turn on and off the chime mode.

Testing System:
